

MOHD NAZEERUDDIN

AWS DEVOPS

PROFILE

Dedicated and results-driven individual seeking a challenging entry-level position as an AWS DevOps Engineer. Eager to contribute my proficiency in cloud computing, automation, and CI/CD methodologies to foster innovation and excellence within a dynamic team environment.

WORK EXPERIENCE

Projects:

1. Automated Deployment with Terraform and Ansible

Designed and implemented Infrastructure as Code (IaC) using Terraform, automating AWS resource provisioning.

Configured and managed instances, security groups, and load balancers through Ansible playbooks.

Achieved 30% increase in deployment speed and reduced errors through efficient, repeatable deployments.

2. CI/CD Pipeline with Jenkins and AWS CodePipeline

Established end-to-end CI/CD pipelines for applications using Jenkins and AWS CodePipeline. Integrated source code repositories and automated build processes, ensuring seamless deployment.

Implemented automated testing, resulting in improved code quality and reliability.

3. Containerized Microservices with Docker and Kubernetes

Containerized applications with Docker, enhancing scalability and resource utilization.

Orchestrated containerized services using Kubernetes, managing deployment, scaling, and service discovery.

Implemented automated rolling updates, ensuring system reliability and minimizing downtime.

4. Infrastructure Monitoring and Logging with AWS CloudWatch and ELK Stack

Implemented robust monitoring solutions using CloudWatch for real-time performance metrics. Established an ELK (Elasticsearch, Logstash, Kibana) Stack for centralized log management and analysis.

Enhanced system visibility, responsiveness, and reduced incident response time.

Internships:

FULLSTACK ACADEMY, TOLICHOKI, HYD.

AWSDEVOPS , 3 MONTH

Collaborated with senior engineers to deploy and manage AWS resources.

Contributed to automation efforts, optimizing infrastructure tasks and enhancing system performance.

Certifications:

AWS Certified Cloud Practitioner.

Soft Skills:

Exceptional problem-solving and troubleshooting abilities.

Strong communication skills, fostering effective collaboration within team environments.

Proactive and quick learner, demonstrating adaptability to emerging technologies and methodologies.

SKILLS

- Cloud Platforms: Amazon Web Services (AWS)
- Infrastructure as Code: Terraform
- Automation/Configuration Management: Ansible
- Version Control: Git
- CI/CD: Jenkins, AWS CodePipeline
- Containerization: Docker
- Orchestration: Kubernetes
- Scripting: Python, Shell
- Monitoring/Logging: CloudWatch, ELK Stack
- Networking: VPC, Subnetting, Route 53
- Database: AWS RDS, DynamoDB

Education

B-Tech (CSE)

Al-Habeeb College of Engg & Tech with (64.44 %)
