Mobile no : 9704215645

OBJECTIVE

Transitioning from a Commerce, I've discovered my passion for technology. My journey began with computer courses in data entry and ADCA from Gnitt, followed by Python basics from Sololearn App. Now, as a DevOps intern, I'm gaining hands-on experience in integrating development and operations.

Eager to learn, adapt, and grow, I'm seeking opportunities to expand my knowledge in DevOps, cloud technologies, and automation. My goal is to become an expert in DevOps Engineering.

Open to connecting with tech professionals, mentors, and learning from industry experts. Let's network and grow together in this exciting field! .

PROFESSIONAL EXPERIENCE

From - Jun-2022 - To - Feb-2024
